The logistics of these coupled companies must work together closely and rapidly. This also demands integral management of logistics. These recent tendencies do not only affect the logistics of the flow of goods itself, but rather also its planning & control, or, in other words, administrative and planning logistics.

Considering FTS as an integral part of logistics management, new conceptual definition of FTS has been provided. This review has pointed out that the issue of developing effective and full chain FTS is quite complex in nature as it requires a deeper understanding of real processes from different perspectives such as economic, legal ...
