Management Of Racing Pigeons Avian

Racing Pigeons JAN HOUMEIJER, DVM CHAPTER Open flock management, which is used in racing pigeon medicine, assumes the individual pigeon is less impor-tant than the flock as a whole, even if that individual is monetarily very valuable. The goal when dealing with rac-ing pigeons is to create an overall healthy flock com-posed of viable individuals.

Disease and Management – PIGEON RACING PHILIPPINES

To reduce loss of young birds (YBs) and to win young bird racing there are two major requirements: 1) As much training as possible, preferably daily releases along the direction for the races until races starts - typically out to roughly 100 km. The training may start 3-4 weeks before the first race.

Young Bird Racing Health Program - Pigeon Vitality

Management of PCV in the individual bird relies upon supportive care and immune modulators such as interleukin. Disease is prevented by quarantine, stress reduction, and careful attention to sanitation.

Pigeon Disease Primer | LafeberVet

While learning to hand feed youngsters at age 4 the attention to detail was ingrained in the day to day management of a loft and the birds. In 2009 the decision was made to venture into the world of Racing Pigeons, what started out as something to have a play around with soon turned into an obsession to not only breed the best but to create a family of birds that could dominate any loft they were flown to.
